

# NetNubby:

## The Safe, Simple Way to Talk on the Net

---

### What is the NetNubby Service?

Imagine you're reading something online—a recipe, a news article, or a product page.

Now imagine you could place a small sticky note right on that page to share a thought. For yourself. For your best friend. Even for total strangers.

That's what the service does. It lets you place Notes on webpages in a way that you control.

### Feel Safe and Snuggly

There are no popularity contests, no public likes, and there is no pressure to be noticed.

It's simply a way to say share thoughts when it matters most to you, in the best place possible.

Your point of view can never be diluted or held hostage to offensive marketing because advertising is not allowed in Notes—ever.

### Say What You Want

Our platform:

- ✚ Gives you the opportunity to speak up and speak out
- ✚ Will not censor you
- ✚ Won't let a democracy (or a special interest group) silence you

### See What You Want

You decide what to view:

- ✚ You can hide Notes anytime
- ✚ You can turn them off completely
- ✚ You can also keep everything 100% private if you prefer

## Your Identity Protected

You'll never have to use your real name or submit your ID.

Your account is secured with state-of-the-art encryption, and your email is never used to log in.

This helps keep your identity right where it belongs—with you.

## Please Think Before You Post

Notes are meant to feel more like real conversation than disposable social media posts.

That means once a Note is posted, it:

- ✚ Cannot be edited
- ✚ Cannot be deleted by the author
- ✚ Remains until it naturally expires or is removed for rule violations

This encourages people to slow down, think carefully, and take responsibility for what they say.

## How NetNubbys Let You Sleep at Night

Our platform is designed from the ground up to give you peace of mind:

- ✚ Secure logins and privacy safeguards keep your account protected
- ✚ Local Notes stay only on your own computer (never on the internet)
- ✚ Harmful or illegal content can be removed
- ✚ Notes can be reported if they break the rules
- ✚ False reporting is also penalized

This encourages people to slow down, tread lightly, and take responsibility for what they read.

## Different Kinds of Notes

- ✚ Public Notes: for everyone
- ✚ Personal Notes: just for you
- ✚ Exclusive Notes: for your bestie
- ✚ Group Notes: for your tribe
- ✚ Local Notes: stored privately on your own computer

Say what you want when you want, using the communication channel that's right for you. Shout to the world or whisper to a friend.

## **Small Groups of Friends, not Big Crowds of Strangers**

Messages are shared within small social circles, not large audiences.

People can quietly ignore Notes if they choose.

## **Your Thoughts Always Visible**

Nobody can crowd your message out, since each webpage holds no more than a handful of Notes.

Most NetNubbys disappear after a few days, keeping things nice and tidy, and reducing clutter.

## **Works Where Your Browser Works**

You can stick ‘Nubbys on regular websites, private networks or decentralized pages; and you can even place them on files on your own computer.

## **You Can Be Safe Online—We Can Help**

NetNubby is designed to encourage thoughtful and respectful communication, but no online service can replace common sense and good safety habits.

Families and individuals are encouraged to:

-  Use trusted browser safety tools
-  Use family-friendly internet filters if desired
-  Keep devices secure
-  Talk openly about healthy internet use

NetNubby works hand-in-hand with these protections, it doesn't try to replace them.

## **Our Big Idea**

Place a nice little sticky note on the internet and share your thoughts.

Talk about things where they happen, safely and without pressure.

## **So... In One Sentence:**

You can say anything about everything, almost anywhere because NetNubbys let you impact the world one Note at a time!
