

A Simple, Safe and Fun Way to Talk on the Net with NETNUBBY®

What is the NETNUBBY Service?

Imagine reading a recipe online. Or a news story. Or maybe a product page for something you know you don't need.

Now see yourself placing a small sticky note right on the page.

Maybe it's:

- ✚ A reminder for yourself
- ✚ A Note for a friend
- ✚ A warning to strangers
- ✚ Just something you feel **ought to be said** (and you're the one to say it)

It can be anything.

That's NETNUBBY.

It's our platform. And it's the name of the digital sticky notes people are leaving all across the web.

Feel Safe and Cozy

NETNUBBY is different. On purpose. We removed the noise and the nonsense.

Consider that we have:

- ✚ No popularity contests
- ✚ No public "likes"
- ✚ No follower worship
- ✚ No pressure to perform for strangers

Just people talking where the conversation truly belongs—right there on the webpage itself.

And advertisements are never allowed inside Notes. Ever.

Nobody gets to buy your attention away from **your own thoughts**. Your point of view can never be diluted or held hostage by offensive marketing.

Say What You Want

Our platform:

- ✚ Lets you speak up and speak out (on your terms)
- ✚ Will not squash your lawful speech (even if it's unpopular)
- ✚ Has no use for complaint mobs (every voice matters)

You don't need permission to have an opinion.

See What You Want

You choose what to view.

- ✚ The contents of the webpage often set the tone of the discussion
- ✚ You can hide Notes anytime
- ✚ You can turn them off completely
- ✚ Keep everything 100% private if you prefer

Some days you want the conversation. Some days you just want the recipe.

Many Ways to Write Them

Not every thought belongs in the same bucket. NETNUBBY gives you choices:

- ✚ **Public** Notes for everyone
- ✚ **Personal** Notes just for you
- ✚ **Exclusive** Notes for your bestie
- ✚ **Group** Notes for your tribe (a contact list you control)
- ✚ **Local** Notes stored privately on your own computer

Say what you need to say with the Note that's right for you.

Dress 'em up and turn 'em loose.

- ✚ Choose from various designs and colours (including semi-transparent)
- ✚ Tilt the Note left or right, or make it stand straight up
- ✚ Select text styles (bold, italics) and alignments (left, right, center, justified)
- ✚ Set text colours and modes (horizontal, vertical, upside down, slanty-wise)
- ✚ Configure specific font sizes, letter spacing and line heights
- ✚ Go wild and mix everything up to make your own signature creation

And when you like what you've done you can save up to 3 NetNubbys in your stash for instant recall later.

Many Ways to Read Them

You decide how Notes should be displayed:

- ✚ Each time you refresh the page or every 30 minutes (automatic timer)
- ✚ Stacked in the corner or spread across the screen
- ✚ Pinned to the window or scrolled with the page
- ✚ See the latest Note or the oldest Note first (you choose the sort order)
- ✚ View the whole shebang on custom Focus Boards (to improve concentration)

Grab a Note and move it anywhere on the page: top to bottom, side to side. Magnify as necessary. It's your show.

Your Identity Kept Safe

We won't ask for your real name. We don't need ID. Whistleblowers and activist grandmas are welcome, and anyone else seeking shelter from an invasive internet.

Your account is shielded with strong modern security. Email is never used to log in.

All this keeps your identity right where it belongs—with you.

Please Post Thoughtfully

Notes are meant to feel like conversation, not disposable digital rubbish.

Once you post a NetNubby, it:

- ✚ Cannot be edited
- ✚ Cannot be deleted by the author
- ✚ Remains until it naturally expires or is removed for rule violations

This encourages people to slow down, think carefully, and take responsibility for **what they say**.

NetNubby Lets You Sleep at Night

Our platform is designed from the ground up to give you peace of mind:

- ✚ Secure logins and privacy safeguards keep your account defended
- ✚ Local Notes stay only on your own computer (never on the internet)
- ✚ Harmful or illegal content can be removed
- ✚ Notes can be reported if they break the rules
- ✚ False reporting is also penalized

This encourages people to slow down, tread lightly, and take responsibility for **what they read**.

A Comfy Group of Friends

Messages can be shared with a small circle of people you trust. Big crowds of strangers don't matter.

People can quietly ignore Notes if they choose.

No guilt.

No pressure.

No drama.

We're not interested in human relationships **becoming public performance art**.

Your Voice Has a Place Here

Each webpage holds a handful of Notes.

Nobody can **hide your voice**.

Nobody can crowd you out.

Most NetNubbys disappear after a few days.

This helps keep things fresh and tidy. No one wants to see junk drawers of digital real estate overflowing with stale arguments.

Works Where Your Browser Works

Stick a 'Nubby on:

-  Regular websites
-  Private browsing pages
-  Decentralized* resources
-  Onion sites
-  Files sitting on your own computer

PDFs, videos... if your browser can open it, chances are you can leave a Note on it.

*You may have a techie family member who can explain what *decentralized* means, if you don't already know

You Can Be Safe Online—We Can Help

NetNubby is designed to encourage thoughtful and respectful communication, but no online service can replace common sense and good safety habits.

Families are encouraged to:

- ✚ Use trusted browser safety tools (software and extensions)
- ✚ Keep devices secure
- ✚ Spend time together online
- ✚ Talk openly about what children encounter on the internet

NetNubby works hand-in-hand with these guidelines. It doesn't try to replace them.

Next Level Security

We are totally serious about protecting you when you use our service, and **we can sincerely prove it.**

Our platform:

- ✚ Won't make you deactivate browser safety features
- ✚ Warns if the connection is insecure
- ✚ Cautions when the domain may be dangerous (malware)
- ✚ Shields your Note from prying eyes while you design
- ✚ Erases sensitive Note text from your computer
- ✚ Plays nicely with ad-blockers
- ✚ Functions with the DNS filter of your choice
- ✚ Integrates with popular VPN software
- ✚ Even warns when somebody is snooping on your connection (SSL sniffing)*

Post a NetNubby

Communication is vital. In person and online. When it's time for digital interaction, we make it simple, safe and fun.

Say anything about everything, almost anywhere.

NETNUBBY helps you impact the world one Note at a time!

*Okay, we're busted: You caught us going full-tilt nerd on you, but these things are *important* to know (just ask your grandson)
